

Navy Seaport-E awards announced July 12 under the Rolling Admissions solicitation.

These contracts are in addition to the existing 2,501 contracts previously awarded under the SeaPort Enhanced (SeaPort-e) acquisition program for services procurements. The government estimates a maximum of \$5,300,000,000 of services will be procured per year via orders issued under the SeaPort-e multiple award contracts.

The SeaPort-e acquisition is comprised of seven regional zones in which task orders will be competed based upon the principal place of performance.

These awards contain provisions to set aside requirements for small businesses, service disabled veteran owned small businesses, 8a business development program and historically under-utilized business zone small businesses. Under these multiple award contracts, each contractor will be provided a fair opportunity to compete for individual task orders solicited within their zone or zones of performance.

The awards have a two-year base period with one five-year award term. These contracts were competitively procured via the Navy Electronic Commerce Online website, with 415 offers received and 385 contracts awarded.

Contract funds will be obligated at the time of task order award and as such, multiple funding types (with varying expiration dates) may be used, consistent with the purpose for which the funds were appropriated.

(Note: Small businesses are identified with an *)
